

**6 Weeks Summer Internship on
Machine Learning and Generative Artificial Intelligence using Python
Project Guide**

As part of the **6 Weeks Summer Internship on Machine Learning and Generative Artificial Intelligence using Python**, all students are required to begin working on their **Research Project**.

Please note the following important deadlines:

- **Research Project Submission: 20th July 2026**
- **Research Paper Submission: 30th July 2026**

Submission of **both the Research Project and the Research Paper** is **mandatory** for the successful completion of the internship and the issuance of the internship certificate.

The internship certificate will be issued only upon the successful approval of the project and research paper by the designated Faculty Guide/Mentor.

A **Google Form** has been shared with you in the group. Every student/group must complete the form by **4th July 2026** with the following details:

- Proposed Project Title
- Domain
- Problem Statement
- Team Members (if applicable)
- Dataset(s) to be used

Only one student from a group should fill the form.

Project Guidelines

- Students may work **individually** or in **groups of up to three members**.
- Select a **real-world problem** that can be solved using the Machine Learning techniques covered during the internship.
- Suitable domains include **Healthcare, Agriculture, Finance, Education, Retail, Human Resources, Cybersecurity, Environment, Transportation, and Social Media Analytics**.
- Choose a **publicly available dataset** and conduct a brief literature review by referring to recent research papers related to your selected problem.
- Ensure that your project is **practical, feasible, and can be completed within the given timeline**.

Research Paper Guidelines

- Students must prepare and write the research paper **independently**. The use of **Generative AI tools** for writing or paraphrasing the manuscript is **strictly prohibited**.
- The **AI Similarity Index must be 0%**.
- The **plagiarism similarity index must be less than 10%**.
- Research papers **must not be submitted to or communicated with any conference or journal without the prior approval and supervision of the designated faculty guide**.

Regular project reviews will be conducted throughout the internship. Students are advised to start early, select an appropriate problem statement, and adhere to all deadlines.
